TOXICOLOGY

Volume Contents

Volume 96 (1995)

Inhibition of human acetylcholinesterase by cyclophosphamide **(The kinetic data for this reversible inhibition are provided**
A.A. Al-Jafari, A.S. Duhaiman, M.A. Kamal (Riyadh, Saudi Arabia)..... 1–6

Cytotoxicity of NO_2 gas to cultured human and murine cells in an inverted monolayer exposure system **(5–20 ppm negatively affect some cellular parameters and reveal different susceptibilities of the cultured cells)**
B. Tu, A. Wallin, P. Moldéus, I.A. Cotgreave (Stockholm, Sweden)..... 7–18

Demonstration of chlorobenzene-induced DNA damage in mouse lymphocytes using the single cell gel electrophoresis assay **(Using the "comet assay" high doses of the solvent induce DNA changes in lymphocytes but not in bone marrow cells**
H. Vaghef, B. Hellman (Uppsala, Sweden)..... 19–28

Agglutinating activity of wheat gliadin peptide fractions in coeliac disease **(Cells from a myeloid leukemia cell line are agglutinated by a peptide fraction isolated from bread and durum wheat)**
M. De Vincenzi, M.R. Dessi, C. Giovannini, F. Maialetti, E. Mancini (Rome, Cagliari, Italy).... 29–35

A two-centre study for the evaluation and validation of an animal model for the assessment of the potential of small molecular weight chemicals to cause respiratory allergy **(Intra-dermal sensitization in guinea pigs is a model for studying respiratory allergies**
L. Blaikie, T. Morrow, A.P. Wilson, P. Hext, P.J. Hartop, N.J. Rattray, D. Woodcock, P.A. Botham (Macclesfield/Sharnbrook, UK)..... 37–50

Immunotoxicology
Position paper
In vitro correlates of the acute toxic syndrome induced by some monoclonal antibodies: a rationale for the design of predictive tests
J.P. Revillard, E. Robinet, M. Goldman, H. Bazin, D. Latinne, L. Chatenoud (Lyon and Paris, France; Bruxelles, Belgium)..... 51–58

Selective modulation of immune function resulting from in vitro exposure to methylenedioxymethamphetamine (Ecstasy) **("MDMA in vitro had no effect on B-cell proliferation and IL-4 production; IL-2 production and NK cell activity were augmented whereas cytotoxic T lymphocyte activity and TNF production were decreased")**
R.V. House, P.T. Thomas, H.N. Bhargava (Chicago, IL)..... 59–69

Toxicology Information and Resources
An overview of the electronic health and safety services of the Canadian centre for occupational health and safety
P.K. Abeytunga (Hamilton, ON, Canada)..... 71–75

Book Review..... 77–78
Announcements..... 79–81

Comparison of ketoconazole- and fluconazole-induced hepatotoxicity in a primary culture system of rat hepatocytes **(Ketoconazole was more toxic than fluconazole)**
R.J. Rodriguez, D. Acosta, Jr. (Austin, TX)..... 83–92

Dichlobenil in the fetal and neonatal mouse olfactory mucosa **(The metabolites of the herbicide bind age-dependently to the mucosa, as shown by autoradiography)**
C. Eriksson, E.B. Brittebo (Uppsala, Sweden) 93–104

Study on the embryofeto-toxicity of citral in the rat **(The no observed adverse effect level was lower than 60 mg/kg per os)**
A.C.M.A. Nogueira, R.R. Carvalho, C.A.M. Souza, I. Chahoud, F.J.R. Paumgartten (Rio de Janeiro, Brazil; Berlin, Germany) 105–113

4-Maleimidohippuric acid — a tailor-made, direct, site-specific nephrotoxin: effects on renal function and ultrastructure in pentobarbital-anesthetized dogs **(Prerequisites for induction of proximal tubular necrosis by a chemical are an anionic and a highly reactive moiety)**
D.A. Koechel, M.E. Krejci, N.S. Bretz (Toledo, OH) 115–126

Comparison of the induction of rat glutathione *S*-transferase and fatty acid ethyl ester synthase activities **(A time-dependent morphological and physiological damage by various doses of thallium sulphate is described)**
G.P. Carlson, A.M. Chaney, F. Jiang (West Lafayette, IN) 127–132

The effects of long-term oral administration of ethanol on Sprague–Dawley rats — a condensed report **(Life span administration of ethanol does not cause an increase in tumor incidence)**
B. Holmberg, T. Ekström (Solna, Sweden) 133–145

Immunotoxicology

Immunotoxicological investigation using pharmaceutical drugs. In vitro evaluation of immune effects using rodent or human immune cells **(The effects of several pharmaceuticals on in vitro lymphoproliferative and cytotoxic functions of mouse splenocytes and human peripheral blood mononuclear cells are compared)**
H. Lebrec, R. Roger, C. Blot, G.R. Burleson, C. Bohuon, M. Pallardy (Chatenay-Malabry, Villejuif, France; Research Triangle Park, NC) 147–156

Dietary vitamin A enhances sensitivity of the local lymph node assay **(Incorporation of dietary vitamin A improves the sensitivity of the local lymph node assay)**
D.M. Sailstad, S.D. Krishnan, J.S. Tepper, D.L. Doerfler, M.K. Selgrade (Research Triangle Park, Chapel Hill, NC) 157–163

Obituary 167–171

Review article

Molecular aspects of chemical carcinogenesis: The roles of oncogenes and tumour suppressor genes **(A review of the genes in carcinogen-induced animal tumors)**
L.A. Stanley (Oxford, UK) 173–194

Further evaluation of the developmental toxicity of tributyltin chloride in rats **(The teratogenic potential of tributyltin is phase-specific)**
M. Ema, R. Kurosaka, H. Amano, Y. Ogawa (Osaka, Japan) 195–201

Functional and morphological aspects of thallium-induced nephrotoxicity in rats **(A time-dependent morphological and physiologic damage by various doses of thallium sulphate is described)**
D. Appenroth, S. Gambaryan, K. Winnefeld, M. Leiterer, C. Fleck, H. Bräunlich (Jena, Germany; St. Petersburg, Russia) 203–215

Species differences in testicular and hepatic biotransformation of 2-methoxyethanol **(No ready explanation for species differences in susceptibility could be found)**
M.T. Moslen, L. Kaphalia, H. Balasubramanian, Y.-M. Yin, W.A. Au (Galveston, TX) 217–224

Immunotoxicology

Possible incorporation of an immunotoxicological functional assay for assessing humoral immunity for hazard identification purposes in rats on standard toxicology study **(Administration of sheep erythrocytes to rats for assessing humoral immunity did not alter hematological and clinical chemistry parameters or the weight and morphology of routine protocol tissues what suggests this functional assay can be incorporated in standard toxicology studies)**
G.S. Ladics, C. Smith, K. Heaps, G.S. Elliott, T.W. Slone, S.E. Loveless (Newark, DE) 225–238

Erratum 239–240
Contents of journals relating to Toxicology 241–245
Author index 246
Subject index 247–250
